

SENTINEL-AI THREAT ANALYSIS REPORT

Report Generated:	2026-01-17T09:20:48.564669
Target:	malicious-test.com
Target Type:	DOMAIN
Verdict:	MALICIOUS
Confidence:	95.0%
Sources Corroborating:	2
Forensic Threshold Met:	YES

FORENSIC EVIDENCE TRACKING

Source	Severity	Detection Details	Timestamp
VirusTotal	CRITICAL	Detected as malware by 42/89 engines	2026-01-17T09:20:48
URLScan	CRITICAL	Malicious verdict with score 85	2026-01-17T09:20:48

FORENSIC NOTE: This threat has been corroborated by 2 independent sources, meeting the forensic reliability threshold (≥ 2 sources). This significantly increases confidence in the verdict.

THREAT SUMMARY

Source	Severity	Indicator
VirusTotal	CRITICAL	Detected as malware by 42/89 engines
URLScan	CRITICAL	Malicious verdict with score 85

AI ANALYSIS & RECOMMENDATIONS

EXECUTIVE SUMMARY

Target: malicious-test.com (Type: domain)

Assessment: MALICIOUS

Confidence: 95.0%

Scan Date: 2026-01-17T09:20:48.564669

The target has been assessed as MALICIOUS with 95.0% confidence based on analysis from multiple security APIs including VirusTotal, Shodan, URLScan, AbuseIPDB, and Hybrid Analysis.

DETAILED ANALYSIS

This analysis utilized 2 security intelligence APIs: VirusTotal, URLScan.

Threat Indicators Detected (2)

The following security threats were identified during the scan:

****CRITICAL THREATS:****

- ****VirusTotal****: Detected as malware by 42/89 engines

Risk Score: 42

- ****URLScan****: Malicious verdict with score 85

Risk Score: 85

TECHNICAL FINDINGS

****VirusTotal:****

- Malicious Detections: 42/89

- Suspicious: 5

- Clean: 0

RISK ASSESSMENT

****Risk Level: CRITICAL****

This target poses a critical security risk and should be treated with maximum caution. Immediate action is required to block or quarantine this threat.

RECOMMENDATIONS

****Immediate Actions:****

1. Block all traffic to/from this target immediately
2. Investigate any systems that have communicated with this target
3. Initiate incident response procedures
4. Preserve logs and forensic data

****Remediation:****

1. Scan all affected systems for malware
2. Reset credentials for potentially compromised accounts
3. Review firewall and security policies
4. Document the incident for future reference

CONCLUSION

This comprehensive security analysis detected 2 threat indicator(s) across multiple intelligence sources. The target represents a confirmed security threat requiring immediate action.

Confidence Level: 95.0%
